

JavaScript + React JS Interview Questions (50)

JavaScript Interview Questions

Basic to Intermediate JavaScript

1. What is JavaScript and why is it used?
 2. Difference between `var`, `let`, and `const`.
 3. What are data types in JavaScript?
 4. Difference between `==` and `===`.
 5. What is hoisting in JavaScript?
 6. What is scope in JavaScript?
 7. Difference between function declaration and function expression.
 8. What are arrow functions?
 9. What is callback function?
 10. What is closure in JavaScript?
 11. What is event bubbling and event capturing?
 12. Difference between synchronous and asynchronous JavaScript.
 13. What is Promise in JavaScript?
 14. Explain `async` and `await`.
 15. What is the difference between `null` and `undefined`?
 16. What are template literals?
 17. What is destructuring in JavaScript?
 18. What is spread operator and rest operator?
 19. Difference between shallow copy and deep copy.
 20. What is DOM?
 21. Difference between `map()`, `filter()`, and `forEach()`.
 22. What is array destructuring?
 23. What are higher-order functions?
 24. What is debounce and throttle?
 25. What is localStorage and sessionStorage?
-

React JS Interview Questions

React Fundamentals

26. What is React JS?
27. Why do we use React?
28. What is Virtual DOM?

29. Difference between Real DOM and Virtual DOM.
 30. What is React Element?
 31. What is JSX?
 32. Why do we use Babel in React?
 33. What is Functional Component?
 34. Difference between Functional Component and Class Component.
 35. What are Props in React?
 36. What is State in React?
 37. Difference between Props and State.
 38. What is Props Drilling?
 39. What is Context API?
 40. What is conditional rendering in React?
 41. How does rendering work in React?
 42. What is list rendering using `map()`?
 43. Why do we use `key` in React lists?
 44. What is React Fragment?
 45. Explain React lifecycle in Functional Components.
-

React Hooks + Advanced React

46. What is `useState()` hook?
 47. What is `useEffect()` hook?
 48. What is `useRef()` hook?
 49. What is `useReducer()` hook?
 50. Difference between `useState` and `useReducer`.
 51. What is Redux?
 52. Why do we use Redux Toolkit?
 53. Difference between Redux and Context API.
 54. What is Axios and why is it used?
 55. How does routing work using `react-router-dom`?
 56. Difference between `BrowserRouter` and `Routes`.
 57. What is protected routing?
 58. What is React Hook Form?
 59. Advantages of React Hook Form.
 60. How to handle form validation in React?
-

Advanced React + Performance

61. What is memoization in React?
62. What is `React.memo()`?
63. What is lazy loading in React?
64. What is code splitting?

- 65. What are controlled and uncontrolled components?
 - 66. What is lifting state up?
 - 67. What is reconciliation in React?
 - 68. What is one-way data binding?
 - 69. Difference between SPA and MPA.
 - 70. How do you optimize React application performance?
-

MERN Stack Project Interview Questions (25)

Project Architecture & Features

- 71. Explain your MERN Stack E-Commerce project architecture.
- 72. Why did you choose MERN Stack for this project?
- 73. How did you implement Signup and Signin functionality?
- 74. How did you perform form validation using React Hook Form?
- 75. How did you implement authentication and authorization?
- 76. How did protected routes work in your application?
- 77. How did you manage state in your application?
- 78. How did you implement routing using `react-router-dom`?
- 79. How did you integrate Razorpay payment gateway?
- 80. How did you create REST APIs in Node.js and Express.js?
- 81. How did you connect MongoDB with Node.js?
- 82. What collections did you create in MongoDB?
- 83. How did you implement CRUD operations?
- 84. How did category-based filtering work?
- 85. How did cart functionality work?
- 86. How did you manage orders and payments?
- 87. How did you handle error messages in frontend and backend?
- 88. How did you use Axios in the project?
- 89. How did you upload images using Multer and Cloudinary?
- 90. How did admin panel functionality work?
- 91. How did you secure APIs using JWT?
- 92. What challenges did you face during development?
- 93. How did you improve application performance?
- 94. How did you deploy the project?
- 95. If given more time, what improvements would you add to the project?
